

Total Recall VR Audio Player

Easy Yet Powerful Call Replay & File Conversion

Total Recall VR Audio Player is a powerful audio player PC application designed to playback, convert and/or email recorded audio from Total Recall VR systems. Easy to use, with waveform audio display.

Total Recall VR Audio Player is the easy-to-use solution for users who need to replay calls from Total Recall VR systems, convert them to common file formats, and/or email them to other people. Offering simple 'drag and drop' operation, visual audio waveforms and integrated file conversion & email, Total Recall VR Audio Player offers powerful yet easily accessible functionality.

Total Recall VR Event Player is a Java/Windows based application designed to run on a PC with a Windows 7, 8 or 10 operating system. (To run the application you need to have a 32bit Java SE Runtime Environment).

Total Recall VR Audio Player offers:

- Player for all Total Recall VR file and audio formats with visual waveform.
- File converter that supports all Total Recall VR file and audio formats.
- Export to standard audio file formats (e.g. WAV & MP3) that are compatible with popular audio player applications.
- Integrated e-mail client for fast sharing of recordings.
- Integrity check for recordings stored in the trc file format.
- Recording metadata display for recordings stored in trc files.
